

# Ajibola Abdullah

Software Engineer

## SUMMARY

Creative, detail-oriented , good team-work skill ,software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

## WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

October 2020 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Built a dictionary project where users find meaning to word
- Built a YouTube background picker and weather App.

### Recent Projects:

#### Card Game:

Users draw card and the player with the highest value or card wins but in case the two players draw equal cards, they go for war by drawing two other cards.

#### Word Wise(Weather App):

This project was designed for user to enter their country and the weather information for the next three days will be displayed. Its a user friendly as the interface are simple to navigate.

#### 100Hours Project –

**Other Projects:** Age checker projects, Los Angeles Stargazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

Front End Web Developer at Icitify|| University of Ibadan

January 2019 — Present

Created front end web applications and responsive websites for different clients across small and medium size businesses. Also, consulted on SEO and social media strategy. Some clients included:
